## Market Outlook – June 2024

Indian benchmark indices continued its upward march, recording new highs as institutional buying reached an all-time high, with Jun'24 witnessing a gain of 7%. However, the Nifty experienced the sharpest single-day decline on June 4 as the BJP fell short of majority on its own, though the index rebounded in subsequent sessions as the formation of BJP-led NDA government reassured investors of policy continuity and political stability. Small caps and Mid caps rose by +9.7%/+8.8% respectively, significantly ahead of Large caps. Information Technology was the best performing sector, led by foreign flows, while Industrials was the weakest as markets were concerned over capex slowdown post-election.

Some of the highlights for the month were as follows: 1) India witnessed a surge in initial public offerings (IPOs), with 31 companies launching Mainboard IPOs from Jan'24 to May'24, up from 6 during the same period last year; 2) India's stock market capitalization crossed US\$5 Tn for the first time, making it the 4th largest market globally; 3) RBI's MPC decided to maintain the repo rate at 6.5%; (4) Fitch Ratings raised India's GDP forecast for FY2025 to 7.2% from 7% earlier; 5) India went through its Lok Sabha election during the last quarter with the political leadership unchanged and PM Narendra Modi, securing a 3rd term as the prime minister of India, albeit with lower number of seats (stark reduction from the exit poll predictions of above 300 out of the 543 seats to 240 by the incumbent ruling party, BJP (292 for NDA alliance)).

FII's ended the month with net buying of \$2.9 Bn (May'24: -\$3.0 Bn), with most of the net buying happening in the second half of the month. We now stand at ~\$160 Mn of FII inflows YTD. DII's remain net buyers for the 11th consecutive month, with robust inflows of \$3.4 Bn in Jun'24 (May'24: +\$6.7 Bn). Mutual funds were net buyers in Jun'24, with inflows of +\$3.2 Bn (May'24: +\$5.8 Bn), and Insurance funds were also net buyers. India's FX reserves came in at \$654 Bn (Jun'24: +\$7.0 Bn added). CPI Inflation in May'24 was lowered to 4.75% (Apr'24: 4.83%), WPI Inflation in May'24 increased to 2.6% (Apr'24: 1.3%) while Industrial Production for Apr'24 moderated to 5.0% (Mar'24: 5.4%).

We expect the current economic and fiscal policies to broadly continue. We do not expect any risk to the macro set-up, which continues to remain robust. Policies and structural economic reforms undertaken in the past have laid a strong foundation and will act as an enabler to achieve 6-7% GDP growth over the medium term. Private capex is expected to pick up as corporates gain more confidence on political stability, continuity of economic reforms in due course and improvement in demand trend. Corporate earnings growth is expected to mirror the robust economic growth outlook. We remain constructive on markets and believe that India's long-term attractiveness remains intact. We would recommend investors to use any drawdown to initiate/increase exposure from medium to long term perspective.

**Primary Risk Disclosures:**

Investment in shares of the Fund involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Fund will be achieved.

As the price / value / interest rates of the securities as well as the currency in which the Fund invests fluctuates, the value of your investment in the Fund may go up or down depending on the various factors and forces affecting capital markets and money markets in India.

Past performance of the Promoter / Investment Manager does not guarantee future performance of the Fund and may not necessarily provide a basis of comparison with other investments.

The name of the Fund does not, in any manner, indicate either the quality of the Fund or its future prospects or returns.

The Fund is not a guaranteed or assured return fund.

Indian equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.

The use of derivatives by the Fund affects the volatility of the Fund and exposes it to the risk of loss due to the unexpected application of a law or regulation or because contracts are not legally enforceable or documented correctly.

The Morningstar Rating TM for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period has the greatest impact because it is included in all three rating periods.

Lipper Leaders for Total Return may be the best fit for investors who want the best historical return, without looking at risk. This measure alone may not be suitable for investors who want to avoid downside risk. For more risk-averse investors, Total Return ratings can be used with Preservation and/or Consistent Return ratings to make an appropriate selection that balances the risk and return. The funds in each index receive scores for each metric in each time period. The bottom 20% of funds receive a "1," the second quintile receives a "2," the third a "3," the fourth a "4," and the fifth quintile receives a "5." The top 20% of funds, those ranked "5," earn the "Lipper Leaders" designation.
