- Composite PMI declined to 59.5 in Nov'24 (Oct'24: 59.1)
- Oct'24 CPI print went up to +6.21% (Sep'24: +5.49%)
- Sep'24 Industrial Production rose sharply to 3.1% YoY (Aug'24: -0.1%)
- WPI rose sharply to 2.4% YoY in Oct'24 (Sep'24: 1.8%)
- Trade deficit oscillated back to US\$ 27 Bn in Oct'24 (Sep'24: US\$ 20.8 Bn)
- India's FX reserves stood at US\$ 657 Bn (25th Nov 2024), signaling RBI selling in the month

Nov'24 was a busy month in terms of quarterly earnings. The earnings growth for Q2FY25 was nearly flat and below expectations. Sustained high food inflation is impacting the urban consumer, while there are signs of revival in rural consumer given the good monsoons. This is the reason RBI has been reluctant to cut the repo rate given the Oct'24 CPI of 6.2% that was driven by another food price shock. Credit growth has slowed down from 13.0% in Sep'24 to 11.5% in Oct'24 as RBI has been trying to slow down the growth in unsecured lending. Central and state government capex has been delayed in H1 due to elections and will have to rise 52% and 40% in 2H as per ICRA. India's 3Q GDP (July-Sep) slowed to 5.4% YoY, the lowest in 7-quarters and much below expectations of 6.5%. Government capex has been slow to kick-off this year because of the general election and grew only 5.4%. Similarly, private consumption slowed to 6.0% from 7.4% in the previous quarter. Exports underwhelmed, growing just 2.8%, reflecting weak merchandise exports. However, we believe that this is likely to represent the quarterly growth trough as government spending is expected to pick up sharply in second half, along with a pick up in agriculture given the good monsoons.

The ruling party won Maharashtra state elections by a wide margin (vs slight edge predicted by exit polls). This helped brush aside concerns around policy continuity.

With respect to corporate newsflow, City gas companies were hit hard as the government unexpectedly lowered the allocation of cheap gas (APM, Administrative Price Mechanism) for the 2nd time in Nov'24.

Life insurance companies got hit as according to media, IRDAI may consider capping share of parent bank in bancassurance business to 50% on concerns of mis-selling of insurance products by banks. HDFCLIFE clarified in a filing that such news reports are inaccurate and such significant regulatory changes will be preceded by detailed industry considerations.

Adani Group stocks took a hit as SEC has charged Gautam Adani (Founder and Chairman of the Adani group) and Sagar Adani (Executive Director of Adani Green and Gautam Adani's nephew) among others, accusing them of paying more than \$250 Mn in bribes to Indian Govt. officials to obtain lucrative solar energy contracts.

**Primary Risk Disclosures:**

Investment in shares of the Fund involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Fund will be achieved.

As the price / value / interest rates of the securities as well as the currency in which the Fund invests fluctuates, the value of your investment in the Fund may go up or down depending on the various factors and forces affecting capital markets and money markets in India.

Past performance of the Promoter / Investment Manager does not guarantee future performance of the Fund and may not necessarily provide a basis of comparison with other investments.

The name of the Fund does not, in any manner, indicate either the quality of the Fund or its future prospects or returns.

The Fund is not a guaranteed or assured return fund.

Indian equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.

The use of derivatives by the Fund affects the volatility of the Fund and exposes it to the risk of loss due to the unexpected application of a law or regulation or because contracts are not legally enforceable or documented correctly.

The Morningstar Rating TM for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period has the greatest impact because it is included in all three rating periods.

Lipper Leaders for Total Return may be the best fit for investors who want the best historical return, without looking at risk. This measure alone may not be suitable for investors who want to avoid downside risk. For more risk-averse investors, Total Return ratings can be used with Preservation and/or Consistent Return ratings to make an appropriate selection that balances the risk and return. The funds in each index receive scores for each metric in each time period. The bottom 20% of funds receive a "1," the second quintile receives a "2," the third a "3," the fourth a "4," and the fifth quintile receives a "5." The top 20% of funds, those ranked "5," earn the "Lipper Leaders" designation.
